Solar storage and charging integrated cabinet 172KWh+120KW-All-In-One with PV, Charger and Energy storage system DC coupling and AC coupling-SHENZHEN iYPOWER CO., LTD.

Explore our advanced energy storage systems: 60kW/120kWh and 100kW/215kWh. Optimize your energy efficiency and reduce costs with reliable solutions.

CHAM has been focus on new energy core technology for 20 years, providing customized products and services to customers with its professional pre-sales and R& D teams.

We have seen an immediate reduction in our energy bills and a change in our power consumption patterns since we installed the PVMARS off-grid solar power system.

Featuring 215kWh of LiFePO₄ storage and a 120kW PCS, this system is engineered for industrial parks and commercial complexes that require high-power energy management.

Our commercial and industrial energy storage system switches to off-grid mode within 10ms during grid fluctuations or outages, ensuring continuous power for critical loads and operations.

Flexible and on-demand configuration of functional components for different business scenarios, including energy storage management, photovoltaic management, charging station management, etc.

The product is widely used in industries such as steel, petrochemicals, metallurgy, mining, cement, power transmission and transformation stations, power generation, and new energy (photovoltaic, ...

To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an innovative base station energy ...

120kW photovoltaic integrated energy storage cabinet for subway stations

Peak shaving and valley filling: by charging and storing energy at valley time and discharging energy at peak time, the electricity cost of customers can be reduced and the electricity charge at the power consumption ...
