Cosin Solar's awarded Qinghai Yichu Golmud 350MW Tower CSP Project (the "Project") is the world's largest single-unit solar thermal power project in terms of installed capacity, heliostat field ...

Construction has officially begun on the Lucy Solar Project, a 350-MW utility-scale solar farm in Concho County, Texas, following a groundbreaking ceremony held this week in Dallas after ...

A Korean-led consortium including Hyundai Engineering has started construction at a 350MW solar PV plant in Dallas, Texas.

The facility will feature three solar power receiver towers feeding heat to a single 350MW steam turbine, enabling it to generate stable electricity 24 hours a day. The project is scheduled to ...

This pair of 350MW CSP projects marks the beginning of the third generation of CSP technology in China. Each features three towers, with three solar fields and a central power block.

Korea Midland Power broke ground on the 350MW Lucy solar plant in Texas, its third U.S. solar project. The plant will produce 926GWh annually and has secured PPAs with Starbucks, ...

The 350MW Lucy Solar Power Plant will be established on a site approximately four times the size of Yeouido, with plans to produce about 926GWh of clean electricity annually. This is ...

Hengxin Technology, via its indirect non-wholly owned subsidiary Qinghai Zhongkong, will invest in and construct a 350MW solar thermal power demonstration project in Delingha, Qinghai...

Hyundai E& C is expanding its presence as a global energy transition leader with the start of construction on its 350 MW solar project in Concho County, Texas.
