Central to the functionality of the fully automated photovoltaic bracket production line are our powerful three-in-one decoiler straightener feeder machines, seamlessly integrated with a ...

The Photovoltaic (PV) Bracket Production Line is a fully automated solution designed for the mass production of solar mounting structures (solar struts/channels).

The main roll forming machine features a highly flexible design. Through manual adjustment or replacement of different roller sets, it enables seamless production of brackets in various ...

The Putai Automatic Solar Panel Mounting Strut Making Machinery provides a perfect synthesis of precision, automation, and versatility needed for high-quality PV bracket production.

JGX1412 is an Angle Punching, Marking and Cutting machine for Angles up to 140*140*12mm. This machine is mainly used for processing holes on angles. The positioning, feeding of the machine are ...

All our machines have one-year warranty. If there is any problems of machine parts under "normal use", new machine parts will be sent to you but your side should pay the shipping cost.

This video shows how an automatic punching machine performs fast and precise riveting for portable solar panel brackets.

The Full Automatic Strut Channel Solar Panel Photovoltaic Bracket Forming Machine adopts corrosion-resistant materials, which can withstand complex and changing outdoor environmental conditions, ...

High quality pv solar bracket punching and cutting machine, Single cutting multiple times, large daily production capacity, higher efficiency than conventional automatic aluminum cutting machine and ...

Automatic punching and blanking machine for photovoltaic bracket

The Photovoltaic/PV Bracket Roll Former (strut channel roll forming line) is specifically designed to produce C-shaped brackets with pre-punched holes, widely used in photovoltaic support systems.
