How much do solar panels cost in Boston?

Solar panel installations in Boston offer an incredibly high level of savings - on average between \$68,073 and \$83,201. This is mainly down to two factors: the Massachusetts SMART program (probably the most generous solar incentive program in the country), and the high residential electricity rates paid by customers here.

How much does electricity cost in Boston?

It is 14.4% greater than the average cost in Boston one year ago (22.9 c/kWh). Boston residents also pay more than their counterparts in Philadelphia, New York City, and the New England region as a whole (18.5 c/kWh, 24.8 c/kWh, and 25.1 c/kWh respectively). The figures for Boston reflect average costs in the Boston-Cambridge-Newton metro area.

Are solar panels the cheapest source of electricity in Boston?

Solar panels are typically the cheapest source of electricity for homes in Boston. Solar panel installations in Boston offer an incredibly high level of savings - on average between \$68,073 and \$83,201.

How much does energy storage cost in 2025?

In 2025, they are about \$200-\$400 per kWh. This is because of new lithium battery chemistries. Different places have different energy storage costs. China's average is \$101 per kWh. The US average is \$236 per kWh. Knowing the price of energy storage systems helps people plan for steady power. It also helps them handle money risks.

The U.S. Department of Energy's (DOE) Energy Storage Grand Challenge is a comprehensive program that seeks to accelerate the development, commercialization, and utilization of next-generation ...

Energy storage can improve the reliability, flexibility, and resiliency of the electric system, making it easier to integrate clean energy sources while delivering savings to ratepayers.

The Energy Storage Initiative In May 2015, Governor Charlie Baker (R) introduced a conceptual Energy Storage Initiative (ESI) in Massachusetts to incentivize energy storage companies ...

Boston solar power generation and energy storage unit price

As of May 2025, the average storage system cost in Boston, MA is \$1690/kWh. Given a storage system size of 13 kWh, an average storage installation in Boston, MA ranges in cost from \$18,674 to ...

The issuance of a Data Request and Survey to Massachusetts solar PV and energy storage market participants regarding current cost, performance and financing assumptions for ...
