Should you buy a home with solar panels?

A home with solar panels has lower electricity bills than an equivalent home without solar panels. Over the life of the solar system, the savings exceed the higher up-front price of the home. Homebuilders can share information with consumers about financing options and incentives described in the Homeowner's Guide to Solar.

Are Solar Homes a good idea?

Solar homes can reduce environmental impact, lower energy bills and promote sustainable living practices. In the last 10 years, homes with rooftop solar arrays have gone from curiosity to commonplace. It's a trend perhaps best exemplified by Home Depot 's decision to start stocking solar panels in 2001 [source: DOE].

Should you add solar panels to your new home?

Adding solar panels to newly constructed homes can increase the sale price, attract new customers, and distinguish a homebuilder and their homes among competitors. A SETO-funded study found that homeowners across the country have been willing to pay a premium for homes with an average-size solar array.
