What is a Type 30 chemical storage cabinet?

Chemical storage cabinets including a type 30 safety box offer a regulation compliant solution for the storage of toxic substances and a small amount of flammable substances in one cabinet. An asecos chemical storage cabinet is ideally suited for the legally compliant storage of toxic, non-flammable chemicals and toxic substances in working areas.

What is a chemical cabinet?

Cabinet for chemicals - modern, safe, and durable equipment for storing chemical substances (mainly acids and bases). Independent and forced mechanical ventilation guarantees high resistance to corrosion and a high level of safety.

What types of doors are available for a chemical storage cabinet?

The doors can be individually selected - wing doors, space saving folding doors or doors with glass panel. Type 30 safety box: An asecos chemical storage cabinet is available on request with a type 30 safety box according to EN 14470-1. This box has all the safety features of a fire resistant safety storage cabinet.

Where are special chemical cabinets used?

They are used even in entities and industries that are not specifically involved in chemical processes. These include schools, universities, public institutes, warehouses, storerooms etc. Special chemical cabinets (laboratory cabinets) offer an optimal solution for the legally compliant storage of such toxic, non-flammable chemicals and toxins.
