-----

Key energy interconnection projects with Romania and the broader EU are advancing swiftly. The Vulcanesti-Chisinau overhead power line, a cornerstone of this strategy, is now 90% ...

With the onset of the war, and Russia's choice to spark multiple energy crises in Moldova as a tool of coercion, the country has had to make rapid changes. In April 2025, an all-time record of ...

The cessation of electricity deliveries from the Cuciurgani power plant in the Transnistrian region has caused a significant amount of cheap energy to disappear from Moldova's energy market.

Preparing for the 2nd annual Moldova Energy Forum, organised by The Voice of Renewables in Chisinau on 10 June 2026, we present a comprehensive summary of the results of ...

The new plant will run on natural gas, and in the future it may be switched to hydrogen. The study also recommends the integration of other renewable energy sources such as solar ...

In the carbon neutrality scenario, the Republic of Moldova will continue importing electricity but natural gas will be replaced by domestic renewable energy power generation in mid-term and by small ...

According to the document, the share of electricity produced from carbon-free sources is set to reach 85% of total local production by 2050, and about 90% of the national electricity demand ...

The Government today authorized the construction of two new efficient cogeneration power plants with a total capacity of 55 MW of electricity and at least 43 Gcal/h of heat.

The asynchronous interconnection in the southern part (Isaccea - Vulcanesti - Chisinau) has started and will consist of the construction of a new 400 kV power line from Vulcanesti to Chisinau and a ...

CHISINAU, Aug 16 (Reuters) - Moldova launched its first tender for wind and solar power plants on Friday

# Chisinau renewable electricity

as part of a push to reduce its reliance on Russian energy.
