How can rack forge help you build a data center?

Building and optimizing data centers requires expertise, precision, and a deep understanding of modern IT infrastructure--all of which Rack Forge brings to every project. With our EPC for Data Centers services, we offer comprehensive solutions that cover engineering, procurement, and construction.

Are data center rack enclosures a commodity product?

At one time, data center rack enclosures and related equipment were considered commodity products--simply a platform to stack equipment, with more enclosures purchased as servers and rackmount equipment were added to the IT inventory.

How much power does a data center rack have?

While power density per rack averaged 6 kW in 2006, it climbed to about 8 kW by 2012, and is expected to approach 12 kW per rack by 2014, according to data collected by the Data Center Users Group, sponsored by Vertiv™. The need now exists for taller, wider and deeper racks to accommodate the changes in IT equipment and densities.

The EPC model consolidates the various risks associated with a complex data center construction project into a single package, overseen by one capable organization.
