We would like to show you a description here but the site won't allow us.

Until 15 February 2022, residential and micro scale solar received no grant aid, no subsidy and no tax

deductions. No Feed-In tariffs were available for these customers and net-metering was similarly ...

Armenia is a country with enormous solar energy potential. Energy flow per square meter is about 1,720 kWh compared to the European average of 1,000 kWh. Accordingly, the Armenian government is providing various incentives to promote solar energy self-consumption practices. For example, residential consumers are exempt from regulations if they have an installed capacity of up to 150 kWh. Per amendments made in 2017, the limit for commercial consumers has been increased, and in the ca...

Discover how to harness solar farm subsidies effectively to maximize financial benefits and promote sustainability. Through understanding best practices and the latest advancements, you ...
