APA Documentation: DOI numbers and URLS This information is adapted from the APA Style online guide at apastyle.apa . The DOI (digital object identifier) or URL (uniform resource locator) is the ...

If you have a DOI, that is a unique and permanent identifier for the document. Present it as a web address so that future readers can just click it in your electronic document and get taken to ...

In APA format, the DOI is a persistent digital identifier that provides a reliable and consistent link to a specific article. It is included at the end of the citation for the article, formatted as ...

This page addresses when to include digital object identifiers (DOIs) and uniform resource locators (URLs) in APA Style references, how to format them, and using DOI and URL shorteners.

A Digital Object Identifier, or DOI, is a unique alphanumeric code that identifies a piece of content and provides a permanent link to its location on the internet.

A DOI (Digital Object Identifier) is a unique and never-changing string assigned to online (journal) articles, books, and other works. DOIs make it easier to retrieve works, which is why citation ...

All DOI numbers begin with a 10 and contain a prefix and a suffix separated by a slash. The prefix is a unique number assigned to organizations; the suffix is assigned by the organization. ...

What is a DOI (digital object identifier)? A DOI, digital object identifier, is a unique alphanumeric string that identifies content and provides a persistent link to its location on the internet.

APA requires publication data for electronic sources. The DOI is the preferred electronic retrieval format because it provides a persistent link to a document's location on the Internet. If no ...

So when citing in the APA format, it's not important to have the name of the database, but you must always

provide some type of address. And depending on whether it's a DOI or URL, the ...
