-----

Dutch solar innovator Wattlab and German inland shipping giant HGK Shipping have teamed up to launch the world's first hybrid solar-powered inland vessel as part of an ambitious ...

The inland shipping sector has reached a significant milestone with the launch of the Blue Marlin, the world's first cargo vessel capable of using solar power directly for propulsion.

In a groundbreaking shift towards sustainable maritime transport, the Blue Marlin debuts as the world's first inland vessel to harness solar power directly for propulsion, setting a new ...

The ship, developed and launched by Dutch solar company Wattlab and German inland shipper HGK Shipping, debuted in July, according to Interesting Engineering. It is the first vessel to ...

Dutch maritime solar innovator Wattlab says it has delivered a 35 kW solar system to provide power to the onboard and propulsion systems of an inland shipping cargo vessel running on ...

With Blue Marlin we take one step more: we use the sun to make the engine run. Fluvial navigation is already a low emissions system, but now it becomes even more ecological.

Solar panels on ships work similarly to those on land, converting sunlight into electricity through photovoltaic cells. Modern advancements have made these panels lighter, more efficient, and ...

MV Vertom Tula is yet another remarkable piece of green shipping innovation coming from the Netherlands. The vessel itself is the newest to join the fleet of Dutch operator Vertom, and the ...

A Dutch-built river cargo ship is the world's first to directly power its motor with solar energy, marking a breakthrough in low-emission freight.

While larger vessels with ample deck space offer the most potential, solar power can be integrated into various

## Does the ship use solar power

ship types. Its effectiveness depends on factors like available surface area, ...
