Carzone has unveiled its 2025 Motoring Report, revealing significant insights into Ireland's shifting attitudes towards electric vehicles (EVs). The report highlights that while 32% of ...

Electric vehicle (EV) adoption is on the rise among Irish councils, with Dublin and Cork leading the charge. A recent analysis by Geotab has highlighted the progress made by various local ...

Understandably, in the counties clustered around Dublin - which itself accounted for nearly half of all new-car sales in Ireland in 2023 - the take-up of EVs and hybrids seems to be ...

With EV sales declining, this article looks at how state-backed measures can boost adoption, helping Ireland meet its climate targets.

Exceeding this target by 1,000 EVs highlights the change in recent years as households, businesses and communities across the country benefit from driving electric. From lower running ...

With nearly 2,000 public EV chargers and over 9,000 new electric vehicles registered in 2024 alone, Dublin comfortably tops the rankings. As Ireland's most densely populated county, the ...

Dublin led in absolute terms with 6,590 new EVs registered up 20%, while Cork (1,319), Kildare (828) and Galway (438) each saw gains of between 30% and 37%. Only Leitrim recorded ...

This shared mobility approach can also drive EV adoption, but in a way that is distinct from the private ownership model. The local authorities are actively exploring this mobility hub approach for the ...

A global leader in connected transportation solutions has revealed three Dublin councils made the top six nationally for electric vehicle (EV) adoption. Geotab has launched its third annual ...

Only 4 percent of respondents have an electric, plug-in hybrid, and non-plug-in hybrid vehicle, compared to 6

Dublin electric vehicle adoption

percent in 2023. Less than half (44 percent) of Irish adults say they definitely would not switch to ...
