Wind could provide 20% of U.S. electricity by 2030 and 35% by 2050. 11 Five of the eight Great Lakes states have offshore wind energy potentials that exceed their annual electricity demand (MI, WI, NY, OH, MN).

How Efficient Are Wind Turbines?  
The Impact of Weather on The Efficiency of Wind Turbines  
Takeaway  
How efficient are wind turbines? In most cases, wind turbines are only 30-45% efficient. But, the percentage goes up a little based on the weather conditions and wind speed. Still, they just cannot be 100% efficient because they utilize potential energy from wind, and it is not possible to extract all that energy.
