Are electric cars allowed in Stockholm?

Under these stringent regulations, only environmentally friendly vehicles, such as electric cars, will be permitted, posing challenges for conventional combustion engine vehicles (including hybrids) navigating the city's streets (Stockholm's City, 2024).

Does dismantling EV incentives affect EV registration rates in Sweden?

Despite the substantial changes to purchase and operating costs, I find that Sweden's dismantling of EV incentives had no significant average impact on BEV registration rates from May 2022 through December 2023.

When will electric vehicles become a part of Sweden's climate agenda?

Subsequently, the Riksdag formally adopted the bill on May 22, 2025. The legislative changes, predominantly taking effect from July 1, 2025, signify swift action from the Swedish government, aimed at quickly integrating electric vehicles into the country's broader climate agenda.

How does Sweden's transport policy change affect BEV registration rates?

In the main analysis, I examine how Sweden's transport policy changes affected BEV registration rates using the SDID specification outlined in equation (4). The treatment dummy $W_{it} = 1$ for Sweden from May 2022 onward, when Sweden implemented its first major policy change by heavily reducing fuel taxes.

As part of Sweden's continued efforts to promote equitable electrification, a new purchase subsidy has been proposed targeting households in rural municipalities with lower incomes. The ...

Sweden's journey offers valuable lessons: the transition to electromobility is lengthy and complex, and effective policies must focus on long-term, foundational elements, such as competence ...

Sweden is the first country to receive the green light for its Climate Social Plan under the EU's new Climate Social Fund. As part of this, over 500 million euros in funding will be provided to ...

Major Developments in 2024 In 2024, new passenger car registrations in Sweden fell to their lowest level in 10 years due to the recession, high interest rates, and lack of policy. Heavy and ...

The incentives and legislations section is updated for 2025, published on 18th April 2025, representing the situation as of that date. Major changes of incentives and polices are updated on a ...

Katja Artta (42420) Abstract: This study examines how mature electric vehicle markets respond to the removal of financial incentives, using Sweden as a case study. Between 2022 and 2024, Sweden ...

On May 22, 2025, Sweden took a decisive step in advancing its climate ambitions by passing Proposition 2024/25:MJU17, titled "New rules for data centers, sustainable fuels, and a new ...

A recent literature review found that drivers for EV adoption included potential environmental benefits, purchase-based incentive policies, business model development, ...

Abstract The sustainable transition strategy in Sweden heavily relies on electrifi-cation, making the dropping sales a cause for concern as the proportion of electric cars in new sales has begun to ...

However, the weakening trend seen in Sweden does not appear to be present in a number of other European countries. They are now very close to Sweden in terms of their share of ...
