Now, the country is officially energy-independent, as the solar installation supports all of the Vatican's operations. What makes the Vatican's solar installation special, though, is that it's a ...

Vatican City is set to become the eighth country in the world to generate 100 per cent of its electricity from renewable energy after Pope Francis announced plans to build a solar plant.

In his apostolic letter, *Fratello Sole* (Brother Sun), Pope Francis detailed the plan to build a solar plant on 424 hectares of Vatican-owned land near Rome. This project will complement existing ...

The quick summary: Vatican City has achieved 100% renewable energy independence through a massive solar installation, joining just seven other countries worldwide that run entirely on ...

Italy has agreed to a Vatican plan to turn a 430-hectare (1,000-acre) plot of land north of Rome into a vast solar farm that will generate enough electricity to meet the needs of Vatican City.

The Vatican City has achieved complete energy independence through renewable sources, making it one of only eight countries running on renewable energy worldwide.

Vatican City has achieved complete energy independence through renewable sources, making it one of only eight countries running on renewable energy worldwide. Before his death, Pope ...

In 2025, the Vatican City flipped the switch on something much bigger than its size. A full transition to solar power. So from now on, the seat of the Catholic Church runs almost entirely on ...

In a quiet corner of the Roman countryside, an ambitious project is taking shape--one that seeks not only to power the Vatican City entirely through renewable energy, but also to embody the...

This tradition got a recent boost. The late Pope Francis' goal of powering the Vatican by 100% solar energy is

Energy independence vatican city

happening now as Vatican City becomes the first fully powered solar state.
