Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications. Explore reliable, and IEC ...

AZE's lithium battery energy storage system (BESS) is a complete system design with features like high energy density, battery management, multi-level safety protection, an outdoor cabinet with a modular ...

This outdoor battery cabinet is highly customizable and designed for telecom, power, and solar energy storage applications. It offers flexible configuration in structure, materials, cooling, electrical ...

It is specifically designed to store and manage energy in an outdoor environment. This system is equipped with various components, including a high-voltage energy storage inverter, a high-voltage ...

Patented outdoor cabinet protection design, optimised cooling air ducts, protection against dust and rain; front and rear doors open for maintenance, facilitating side-by-side arrangement of multiple systems ...

200 kWh intelligent string outdoor battery cabinet with IP55 protection, designed for secure and efficient energy storage in harsh environments.

Featuring an IP55/IP65-rated enclosure, it offers excellent resistance to water, dust, and corrosion, making it ideal for solar energy, wind-solar hybrid, off-grid, and industrial backup power systems.

With an IP55-rated enclosure, built-in UPS modules, breaker protection, and dedicated battery space, Citadel ensures continuous operation for telecom, traffic, and CCTV systems under extreme conditions.

Explore AZE's premium NEMA-rated and weatherproof enclosures designed for telecom, industrial electrical, and energy storage applications. Built to withstand harsh environments and extreme ...

Energy storage cabinets for remote areas IP55

Supporting both AC and DC coupling, up to 10 units can be connected in parallel, with a maximum capacity of 2150kWh. It adopts a built-in air duct design and supports a charge/discharge rate of ...
