Summary: Solar panel costs have dropped 82% since 2010, while lithium-ion battery storage prices fell 89% in the last decade. This article explores price drivers, global market trends, and actionable ...

This observation is reinforced by the results of this year's marginal cost analysis, which shows an increasing price competitiveness of existing gas-fired generation as compared to new-build ...

For the virtual power plants containing energy storage power stations and photovoltaic and wind power, the output of PV and wind power is uncertain and virtual power plants must consider this ...

Watch these six video tutorials to learn about NLR's techno-economic analysis--from bottom-up cost modeling to full PV project economics.

Solar energy in the United States is booming. Along with our partners at Wood Mackenzie Power & Renewables, SEIA tracks trends and trajectories in the solar industry that demonstrate the diverse ...

National summary: Solar pricing trends Quoted solar prices dropped to \$2.50 per watt, the lowest in history.

2020 Cost and Performance Assessment provided installed costs for six energy storage technologies: lithium-ion (Li-ion) batteries, lead-acid batteries, vanadium redox flow batteries, pumped storage ...

The US Energy Storage Monitor is a quarterly publication of Wood Mackenzie Power & Renewables and the American Clean Power Association (ACP). Each quarter, new industry data is compiled into this ...

The U.S. Department of Energy's solar office and its national laboratory partners analyze cost data for U.S. solar photovoltaic systems to develop cost benchmarks to measure progress towards goals and ...

Average price of solar modules, expressed in US dollars per watt, adjusted for inflation.
