What is the Gobi desert plant?

This Gobi Desert plant represents a major engineering and technological achievement, combining innovative design, energy storage, and efficiency improvements. It shows how solar thermal power can complement other forms of renewable energy and play a crucial role in providing continuous electricity.

Why is the Gobi Desert a great place for solar power?

This severe dryness, coupled with the abundant sunlight exceeding 3,000 hours annually, renders the Gobi Desert an ideal location for extensive solar power generation. The remarkable solar-thermal power station is said to feature two towers, each standing 656 feet high (200 meters), encircled by a vast array of 27,000 mirrors known as heliostats.

What is the world's first solar-thermal power plant?

world's first solar-thermal power plant in the China's Gobi Desert. China has achieved a groundbreaking advancement in renewable energy technology with the recent inauguration of the world's first solar-thermal power plant, which employs a dual-tower system to produce electricity in the Gobi Desert.

Where is China's new solar power plant located?

This new plant is designed to be cheaper and more efficient than traditional solar thermal power stations, making it a major step forward for renewable energy. The power station is located in Guazhou County in Gansu Province, in northwestern China.

In a groundbreaking development, China has activated a solar thermal power station in the Gobi Desert, a project characterized as a more cost-effective and efficient application of the ...

China has commissioned the west tower of the world's first dual-tower, single-generator solar thermal power plant in Guazhou, northwest China's Gansu Province. More than 20,000 ...

This intense dryness, as well as the abundant sunlight of more than 3,000 hours a year, make the Gobi Desert an excellent environment for large-scale solar power generation. The ...

China leads the world in installed solar capacity, and the start-up of its largest solar farm to date will bring it one step closer to a coal-free future. China's 3 GW Mengxi Blue Ocean PV Power ...

# Great Gobi Solar Power Plant

China's 3 GW solar plant with nearly 6,000,000 panels to power millions of homes With nearly 6 million panels, the project will prevent release of 4.7 million tons of CO2 every year.

South China Morning Post, Oct 8, 2025 China has switched on a world-first solar thermal power station, located in the Gobi Desert. The station is said to be a cheaper and more efficient use ...

This Gobi Desert plant represents a major engineering and technological achievement, combining innovative design, energy storage, and efficiency improvements. It shows how solar ...

China Three Gorges Corporation's dual-tower solar thermal plant in the Gobi Desert is a world-first, providing stable, 24/7 clean power

Explore Xinjiang's lighthouse in the Gobi: a 220m molten salt tower with 14,500 mirrors generating 50MW of stable, clean energy.

Explore the world's first solar-thermal power plant in the Gobi Desert, a project that sets new standards for renewable energy technology.
