We can create a custom solar electrical design for your home that's compliant with local codes and regulations. We'll work closely with your city, HOA and utility to get your system up and running.

The Gree Photovoltaic Direct-driven Inverter Multi VRF System combines the characteristics of photovoltaic power, making sure that the consumed electricity of units matches the photovoltaic power generation to ...

Gree's new Solar Hybrid can accept DC power directly from the Solar Panels without the need of an expensive inverter or controller. The solar DC power directly replaces the mains power being supplied by your energy ...

GREE's System Builder application allows you to build the perfect system for any project.

In April 2018, the two-stage triple-cylinder compressor developed by Gree won the gold medal awarded by the International Association of Inventions in Geneva. This time the award again proves the strong R& D strength ...

Adopted the efficient direct-driven inverter compressor, Gree PV Direct-driven inverter multi VRF system is creating the new air conditioning era of energy conservation and comfort with the leading all DC inverter ...

Detailed guide to the many specifications to consider when designing an off-grid solar system or complete hybrid energy storage system. Plus, a guide to the best grid-interactive and off-grid inverters and ...

Adopt all new aluminum plastic design, with stronger heat dissipation capability and longer service life (components). Adopt modular design concept for the unit's structure to realize fast-assembly as well as fast ...

Gree GMV Solar Generation II adopts inverter compressor technology, with capacities ranging from 3 tons to 10 tons. It has a broad product lineup and is widely applicable to places such as residential houses, ...

Gree solar power generation system design

GREEF Engineer specializes in providing customized solutions for new energy power generation. We excel in integrating and designing photovoltaic, wind, and hydropower systems.
