On Aug. 28, the "Ganghangping 5," a self-propelled and jack-up offshore wind turbine installation platform with China's highest elevation height, strongest comprehensive lifting capacity ...

It uses five 7.7 MW units and eight 6.7 MW units specifically designed for low-wind-speed scenarios in this series, with a hub height of 131 meters and standard 118-meter blades.

The successful installation of 16MW wind turbine signifies a significant breakthrough in the manufacturing of high-end equipment for large-capacity offshore wind turbines in China. This ...

Since the first batch of wind turbines was connected to the grid on Jan 16, the project has generated 180 million kWh of clean electricity, CECEP said. Located in an area with complex sea ...

As the fourth-generation jack-up and self-propelled offshore wind turbine installation platform in China, it has a 135-meter-long pile leg with its jack-up system.

A 500,000-kilowatt (kW) offshore wind power project successfully achieved the grid connection of 78 turbines in South China's Guangdong Province, marking the nation's first affordable...

SHENZHEN, Dec. 12 (Xinhua) -- The largest offshore wind power project in the Guangdong-Hong Kong-Macao Greater Bay Area, with an annual electricity generation capacity of 3 billion kWh, is now fully ...

Sichuan Jiange Guangping wind farm is a wind farm under construction in Bailong Town, Jiange, Guangyuan, Sichuan, China.
