In a first, China has switched on a solar thermal power station in the Gobi Desert, a project described as a more cost-effective and efficient use of the technology, with the potential to be scaled ...

China has reportedly developed the world's first dual-tower solar thermal plant near Guazhou County in Gansu Province to enhance efficiency and reduce carbon dioxide emissions.

On December 31, 2024, the Rudong Integrated Photovoltaic (PV)-hydrogen-storage Project, operated by CHN Energy's Guohua Energy Investment Co., Ltd. was successfully connected to grid.

Upon completion, the project is expected to generate 1.78 billion kilowatt-hours of power annually, enough to meet the needs of approximately 2.67 million urban residents in China.

On 31 December 2024, the 200MW Guazhou Haohua Photovoltaic Project was successfully connected to the grid, injecting new momentum for green development into Guazhou.

On the morning of January 18, the groundbreaking ceremony for the Three Gorges Energy Yicheng District Cloud Energy Storage Project was held in Gushao Town.

In Guazhou county of Northwest China's Gansu province, a solar thermal energy storage power station can generate power for 24 hours nonstop. Its main project has begun commissioning and will be put ...

LANZHOU, July 19 (Xinhua) -- In Guazhou County of northwest China's Gansu Province, a solar thermal energy storage power station can generate power for 24 hours non-stop.
