How has Syria reconnected to the Global Telecoms Landscape?

Syria's reconnection to the global telecoms landscape follows a decisive shift in US foreign policy. In May 2025, the US Treasury's Office of Foreign Assets Control (OFAC) issued General License 25, authorising a wide range of telecommunications-related transactions.

How did the telecommunications sector grow in Syria?

Syria's telecommunications sector grew after Bashar al-Assad assumed power in 2000--a stark contrast to the era of his father, Hafez al-Assad, who followed a strict security approach. He limited the telecom infrastructure to fixed landlines without any expansion into internet services throughout the country.

How to improve telecommunications infrastructure in Syria?

Recently, the Syrian Minister of Communications and Information Technology, Hussein al-Masri, provided several measures to improve the telecommunications infrastructure in Syria. This includes issuing licenses for five internet service providers, with plans to grant 20 more within two weeks.

How has the telecommunications sector deteriorated in Syria?

Since the onset of 2011, Syria's telecommunications sector and internet networks have greatly deteriorated, especially in regions affected by military conflicts or foreign intervention. The post-war investment downturn resulted in a scarcity of resources necessary for modernizing the current network infrastructure.

Power Supply for Base Station Strategic Insights for 2025 Mar 25, 2025 · The global power supply market for base stations is experiencing robust growth, driven by the widespread deployment of 5G ...
