How much does a generator cost?

Portable gasoline generators cost \$500 to \$2,500 for a 3 to 10 kW backup unit. Whole house generators cost \$2,000 to \$6,000 a natural gas or liquid propane system, without installation. Standby backup diesel generators cost \$5,000 to \$18,000. *Prices for units with power capacity of 2 to 24 kW. Not including installation.

How much does a Generac Generator cost?

The Generac generator cost varies dramatically based on your power needs and installation complexity. Portable Generac generators start around \$500 for basic models, while whole-house standby units range from \$2,000 to over \$15,000. Installation adds another \$3,000 to \$6,000 to the total investment.

How much does a generator installation cost in 2025?

Quick answer: In 2025, a typical whole house generator installation costs \$6,000-\$30,000, driven by generator size (kW), brand, transfer switch, electrical upgrades, fuel line/permits, and local labor rates.

How do I choose a Generac generator?

Generac generators stand as America's most trusted solution for residential backup power, but choosing the right model requires understanding costs, capabilities, and installation requirements. The Generac generator cost varies dramatically based on your power needs and installation complexity.

Let's focus on two popular whole house generator sizes: 13 kW and 30 kW. The cost of running a whole house generator depends upon these variables below.
