Can You mount a solar panel under the roof rack of a van?

Yes, you can mount a solar panel under the roof rack of your van. However, there are a few considerations you're going to need to make before you start this project. Mounting a solar panel underneath your roof rack has some unique challenges that more traditional mounting setups don't have to consider.

How do you install a roof rack over a solar panel?

Fit the roof rack over the solar panel. Make sure to have a friend help you to avoid damaging the panel. Bolt the roof rack down into the holes we drilled in step 3. Examine the solar panel and roof rack to make sure everything fits just how you want it to.

How to install a solar panel on a van?

The first step is to fit your solar panel to your DIY sliding mount. Make sure that any cables can reach back into your van even when the slide is fully extended. Dry fit the sliding mount onto the roof of your van and mark any spots where you need to drill holes for the mounting brackets. Now, get your roof rack and dry fit that as well.

Do solar panels fit on roof racks?

The panel size should fit comfortably on the rack without overhanging excessively. The weight is also important--lightweight panels are easier to handle and reduce strain on the vehicle's roof structure. There are two common methods for attaching solar panels to roof racks: fixed mounts and tilt mounts.

Roof racks on vehicles have become more than just carriers for luggage. Today, they're being used to mount solar panels, offering a portable energy solution for those on the move. The ...
