How to install a solar pole in a rig?

Rig has to work with air compressor together for percussion drilling. In this way, it can make a borehole firstly, then put the pile inside or concreting a pile. When it needs to install the solar pole in more efficiently way and have it stably installed, hammering the pile into ground directly is the best way.

How to choose a hardrock PV piling machine?

Hardrock PV piling machine includes DS100, DS200, DS300, DS300H totally four different models. It can be selected based on the pile shape and depth. Photovoltaic Pile Driver Configuration Solar Pile Drilling Method - totally three different drilling procedures for PV drilling as following

What is a photovoltaic pile driver?

Photovoltaic Pile Driver Configuration Solar Pile Drilling Method - totally three different drilling procedures for PV drilling as following. The pile driver drives the auger into soil directly by rotating, it is only for the soft ground such as soil, sand, soft clay. When drilling for hard formation like rock, hard clay.

How many types of photovoltaic rigs are there?

There are several types of photovoltaic rigs, from manual rig, to semi-hydraulic pile driving machine to fully hydraulic drilling rig. Hardrock PV piling machine includes DS100, DS200, DS300, DS300H totally four different models. It can be selected based on the pile shape and depth.
