Where is Telkomsel launching 4G & 5G mobile services in Indonesia?

Indonesian telco Telkomsel has deployed 49 base stations to support 4G and 5G mobile services in the country's new capital city, Nusantara which is set to open on August 17, located on the island of Borneo, 800 miles away from the current capital Jakarta on the island of Java.

Why should Indonesia standardize 5G BWA equipment requirements?

By standardizing 5G BWA equipment requirements, Indonesia aims to foster safer, more reliable, and spectrum-efficient wireless broadband services as it transitions into a 5G-connected future. For this article's source information and any product certification guidance, please contact Global Validity.

Can 5G BWA devices be used indoors?

Usage Limitation: Subscriber stations are limited to indoor use only. In accordance with Ministerial Regulation No. 3 of 2024, all 5G BWA devices must undergo DJID/SDPPI certification using these technical standards as references. Stakeholders including manufacturers, importers, and vendors must ensure compliance through certified testing labs.

Why is a 1.4 GHz band important in Indonesia?

These aspects are essential for a full spectrum of regulatory oversight and are expected to be enforced as part of Indonesia's evolving compliance infrastructure. Telecom operators using the 1.4 GHz band must coordinate closely with vendors to ensure declared antenna gain values are adhered to.

5G Base Station Construction Market in Indonesia This market report covers trends, opportunities, and forecasts in the 5G base station construction market in Indonesia to 2031 by type (femto, pico, small, ...)

The Ministry of Communication and Digital Indonesia issued KM No. 204/2025, requiring all 5G BWA equipment to comply with IMT-2020 and ETSI standards. Learn how this affects ...
