With 4,800+ hours of annual sunshine and a 270-million population, Indonesia's solar power system market is heating up faster than a tropical noon. The archipelago's energy demand is projected to ...

With increasingly affordable, modular, and easy-to-build and operate solar power plant (PLTS) technology, this project could serve as a strategic solution to provide reliable and affordable ...

Indonesia is positioned to be a regional leader in renewable energy, with solar PV at the core of its decarbonization strategy. The combination of vast solar potential, improving policies, and ...

Indonesian President Joko Widodo has officially opened Indonesia's newest and largest floating solar plant, Nikkei Asia reports. Covering an area of over 250 hectares (2.5 km²), the new...

These solar-plus-storage mini grids are set to be installed in 80,000 villages across Indonesia and will be managed and operated by village cooperative Merah Putih. The initiative also ...

Recently, in August 2025, the Indonesian government unveiled an ambitious program to develop 100 GW of solar power plant capacity between 2025 and 2030. The plan is divided into two ...

Indonesia's strong solar irradiation and equatorial positioning makes it suitable for establishing fixed-axis mount solar panels. These are the easiest and quickest to install, allowing entire utility-scale solar ...

Indonesia's Minister of Energy and Mineral Resources, Bahlil Lahadalia, has said that his government is targeting the development of 100 GW of solar power plants (PLTS), targeting the ...

JAKARTA - A new manufacturing plant producing floating solar panel systems was officially launched in Batam on Feb 14 to tap opportunities created by a major deal to supply solar ...
