-----

Iran has opened the first phase of its largest solar power plant as part of a massive government program to expand renewables capacity in the country.

The inauguration of these new solar power plants is a clear indication of Iran's dedication to renewable energy. With continued investment and government support, Iran is well on its way to ...

TEHRAN (ANA)- The operation of solar power plants with a capacity of 205 MW and the implementation of a project to construct solar power plants with a capacity of 75 MW in different cities ...

Iran has set a new record in solar power generation, with output from its solar plants reaching 800 megawatts on August 26, according to the Renewable Energy and Energy Efficiency ...

Iran's president inaugurates 250 megawatts of new solar power plants. Iran has expanded its renewables capacity by opening 250 megawatts (MW) of new solar power plants.

Iran is racing against time to complete the construction of a massive solar power plant in its central province of Isfahan, a project expected to supply electricity to nearly 2.5 million homes.

Recently, Jafar Mohammadi Nejad Sijaroudi, Deputy Director of Investment at Iran's Renewable Energy and Energy Efficiency Organization (SATBA), confirmed that the country has ...

The first phase of Iran's largest photovoltaic solar power plant, Aftab-e-Sharq, with a capacity of 20 megawatts, was successfully synchronized with the national grid on October 21. ...

The 120 MW Aftab Sharq solar plant in Isfahan, a EUR305 million project set to expand to 600 MW, advances Iran's renewable capacity goals amid Western sanctions.

Backed by major Chinese investment and SATBA's support, the new 200 MW solar plant signals strong
