How much do solar panels cost?

The average solar panel installation will work out to about \$3 per watt. Many factors will impact a system's cost, like the size, equipment used, and installer. No matter how you cut it, solar is a high-priced investment. Luckily, you can finance a solar installation in several ways. How much do solar panels cost near you?

Are solar panels a good investment?

With proper planning and the right financing, solar panels can provide decades of clean energy and substantial savings. For the most current rates and terms, contact lenders directly and consider consulting with a financial advisor to determine the best solar financing strategy for your specific situation.

Should you pay cash for solar panels?

Paying cash for solar panels is an excellent idea for people with a good deal of savings who pay a fairly large federal tax every year. They can claim 30% of the costs to install solar panels on their next year's tax return and start recouping the cost of their solar investment using energy bill savings from day one.

How much money can you save with solar panels?

But it's still smart to ask and confirm in any loan documentation if there is one. Most homeowners save around \$50,000 over 25 years. Create your own clean energy with solar panels. Enjoy the benefits of solar without rooftop panels.
