Are you traveling to Estonia? Find out what power plugs and outlets are being used in Estonia. Also, see if you need a travel adapter.

# Is outdoor power supply allowed in Estonia

Oil-based fuels, including oil shale and fuel oils, accounted for about 80% of domestic production in 2016. There is also some natural gas capacity, but no coal generation. The largest power complex in the country, Narva Power Plants, consists of the world's two largest oil shale-fired thermal power plants. The complex used to generate about 95% of total power production in Estonia in 2007. Falling to 86% in 2016 and 73% in 2018.

According to the International Energy Agency 's (IEA) 2023 Energy Policy Review for Estonia, the country is assessing the potential adoption of nuclear power into its energy portfolio, with a decision ...
