Why is the Kosovo transmission system project necessary?

Based on all the facts mentioned, and KOSTT's fundamental and essential duty of secure and reliable operation of the Kosovo Transmission System in real time, the project is necessary at the time for which it is planned.

Why does Kosovo have a 400 kV transmission network?

This configuration of 400 kV network provides Kosovo's transmission network stability and sustainability in operation, due to a high flexibility of shifting power flows in the event of opening one of the four above mentioned rings. Figura 5-14.

Will Kosovo have a transmission network in the next 10 years?

The capacity of the interconnection lines of the transmission network in Kosovo will be much higher than the needs for imports, or opportunities for exports of electricity that our country will have in the next 10 years and considering the volume of significant transit flows (in our network) for the region needs.

What is Kosovo's Energy Development Plan?
