DTEK and American Fluence completed the construction of the largest energy storage system (BESS) in Eastern Europe. The project will ensure stable electricity supply to Ukrainians, ...

The DTEK-Fluence BESS project is now the largest in Ukraine and one of the largest in Eastern Europe, demonstrating the large-scale deployment of advanced storage technologies to ...

In March, DTEK announced it was building Poland's first large electricity storage facility as part of its plan to establish a pan-European energy system connected to Ukraine.

Unlike other storage conferences, proceeds from the event help to fund high quality journalism across our media titles. This supports the growth of the solar and storage industries as well as the transition ...

The six battery energy storage systems (BESS) range from 20MW to 50MW each, have been connected to the power grid in the Kyiv and Dnipropetrovsk regions, and will provide ancillary ...

Six new battery storage systems of varying capacities - from 20 to 50 MW each - have been connected by DTEK to the power grid in the Kyiv and Dnipropetrovsk regions.

The company has connected six new battery storage systems to the power grid in the Kyiv and Dnipropetrovsk regions, with individual capacities ranging from 20 MW to 50 MW.

As an alternative to the current backup power options, mainly diesel generators, PKP is developing Battery Energy Storage Systems to be installed together with all 350 PV-equipped schools.

In total, 197 MW of lithium-ion BESS will be installed at four hydro power plant sites (Kyiv, Kaniv, Kremenchuk, and Serebriahivska). Additionally, 35.9 MWp of solar PV plants will be installed.
