Find up-to-date statistics and facts on the global solar photovoltaic industry.

All solar segments set annual installation records except for residential solar, which experienced its lowest year of new capacity since 2021. The factors driving installation growth in ...

The present review study, through a detailed and systematic literature survey, summarizes the world solar energy status along with the published solar energy potential assessment articles for ...

Solar power created more new jobs than any other energy source in 2021 according to the US Department of Energy. Wind and hydropower ranked 2nd and 3rd in terms of job creation, ...

Though thin-film PV represented around 3% of global PV deployed from 2015 through 2023, it accounted for more than 17% of U.S. PV deployments during this period (24% of utility-scale ...

o Utility-scale solar (including PV and CSP technologies) and C& I PV electricity production dropped by 46% from its summer peak (July 2024) to its winter low (December 2024), ...

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector.

Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating ...

In early 2025, SolarReviews concluded our third annual survey of companies in the U.S. solar industry. We heard from hundreds of companies that comprise various industry sectors, from residential solar ...

Best overall: Maxeon 7. The most efficient residential solar panel right now is the Maxeon 7, which dethroned

Latest photovoltaic utilization rate of solar panels

the older Maxeon and Canadian Solar panels when it launched in February 2024.
