Does Longi's Hi-mo 5 module withstand hail testing?

LONGi has conducted new hail performance testing which indicates that, whereas its Hi-MO 5 module (based on a 182mm wafer with dimensions of 2256x1133mm, 2.56m²), is able to withstand testing, the oversized module (dimensions 2384x1303mm, 3.11m²) is unable to do so.

What is a Longi Hi-mo 5 LCE-Shield Module?

LONGi Hi-MO 5 Ice-Shield Modules Feature 3.2mm Coated Tempered Glass. Redefining Photovoltaic Glass Standards LONGi Hi-MO 5 Ice-Shield Modules have demonstrated excellent performance in various reliability tests. LONGi Lifecycle Quality Management Designed for the Worst, Built to Last.

Does Hi-mo 5 pass a 35mm hail impact test?

A T&V S&D report has also demonstrated that Hi-MO 5 was successful in passing a 35mm hail impact test. 1. Technical Feature of PV Glass: The bigger the glass area, the less mechanical strength. The mechanical strength of PV glass is mainly affected by the temperature gradient in the tempered furnace.

Longi solar panel performance characteristics over 30 years. Another fantastic attribute of the Longi 445W Bifacial Solar Panel is its longevity. Longi guarantees these solar panels will continue to ...

To address this growing risk, LONGi has developed the Hi-MO 9 Ice-Shield module. This solution is designed to withstand extreme hailstorms while maintaining high power output. It ...

LONGi has conducted new hail performance testing which indicates that, whereas its Hi-MO 5 module (based on a 182mm wafer with dimensions of 2256x1133mm, 2.56m²), is able to ...

LONGi, a China-based PV module manufacturer, has launched the Hi-MO 9 Ice-Shield module to improve PV plant resilience against increasing hail-related damages. According to the ...

LONGi Hi-MO 5 Ice-Shield Solution Strong hail resistance up to 55mm hail Strong wind resistance up to 3600Pa with tracker Same long-term durability with standard product Weight is ...

Certified up to 65mm hailstone and 17X impact energy compared to IEC standard 25mm hail test.

Longi photovoltaic panel hail test

LONGi has launched a new solar panel designed for durability and reliability in hail and windstorms. The Hi-MO 5 Ice-Shield module is a dual-glass bifacial panel that uses thicker top-glass ...

In RETC's "2025 PV Module Index Report," LONGi modules received the "Highest Achievement" award across all 13 core tests - including hail sequence validation.

A T&V S&D report has also demonstrated that Hi-MO 5 was successful in passing a 35mm hail impact test. 1. Technical Feature of PV Glass: The bigger the glass area, the less ...

With global climate change leading to frequent extreme weather events, the safety of solar plants and the associated stable income of customers has become a serious concern for the industry ...
