With battery prices falling, hybrid systems that enhance energy security and reduce reliance on costly diesel generators are becoming increasingly popular in Mali - particularly in office buildings, which ...

After reaching financial close in late 2024, construction began in early 2025 and has now reached its commercial operation date in the first quarter of 2026, under a 25 to 30-year Power Purchase Agreement ...

In partnership the two companies have successfully developed, financed, constructed and are currently operating the large scale solar project in Mali.

Our eco° SOLAR initiatives deliver engineered clean-energy solutions -- including commercial BESS, solar generators, solar air conditioning systems, and solar lighting -- for homes and businesses across Mali.

Mali has opened its first solar panel manufacturing plant, a facility fully owned by Malians. The new solar panel manufacturing plant will reduce solar panel imports and help boost Mali's progress in clean ...

As of May 2024, Mali obtains 70 percent of its electricity from fossil-fuel sources. This solar farm, when completed, will be the largest solar power station in the country and in West Africa.

Plans to add over 500MW of solar PV capacity by 2028 would go some way towards balancing Mali's energy mix.

Insecurity caused by extremist attacks is another challenge to expansion in Mali, especially in the north, limiting the areas where companies can safely set up solar mini-grids.

Leading solar energy solutions in Mali - Utility projects, rural electrification, industrial & commercial solutions, and residential services.
