the invention provides a real micro-grid operation dynamic simulation test platform based on RT-LAB, breaks through the existing simulation platform construction method, avoids the...

To address the demanding needs of industry and university research groups pursuing critical innovations in Smart Grid and Microgrid technologies, National Instruments has joined forces with other industry leaders to ...

Using the digital real-time simulator capabilities within its Energy Systems Integration Facility, NLR is developing a hardware-in-the-loop test bed to simulate events and their impact on system stability ...

Join us for an introduction and live demonstration of the new open source, commercially available platform spans from a low cost MyRIO Bidirectional Microgrid Inverter that enables students to form a ...

This paper presents an integrated hardware-in-the-loop (HIL) platform for testing the operation and control of a real-world microgrid system prior to site commissioning.

This cyber-physical test platform makes it possible to test not only factors like microgrid power quality and transitions between modes, but also communications protocols and latency and bandwidth requirements for ...

Test wide range of grid-tied products, low to high. Simultaneous AC and DC operation per phase AND automatic switching of outputs provides extensive flexibility. Embedded Real-Time Remote Control Platform to easily ...

Our hardware-in-the-loop (HIL) and power hardware-in-the-loop (PHIL) solutions let you simulate complex microgrid environments with high fidelity and in real time, without the risk and cost of field testing.

Includes a suite of fixed-step solvers and algorithms designed to optimize models of electromagnetic transient (EMT) systems for real-time simulation, all while retaining their high-fidelity.

Microgrid real test platform

With CHP, engineers can simulate real-world scenarios with precision, testing microgrid systems under dynamic conditions. From EVs to grid emulations, CHP empowers manufacturers to optimize performance, ...
