What is a motor circuit breaker?

Motor circuit breakers are more than just on/off switches. They incorporate various features designed to provide comprehensive motor protection and enhance the overall safety and reliability of electrical systems: Safeguarding motors from overheating due to excessive current draw, MPCBs offer adjustable overload protection.

What products does Schneider Electric Australia offer?

Schneider Electric Australia. Discover our range of products in Motor Circuit Breakers and Switches: Compact NS80H MA

Why do you need a motor circuit breaker & switch?

Give your motor equipment the protection it needs by installing quality motor circuit breakers and switches. Our range has a high breaking capacity at a very compact design. Use it to give your motor equipment dedicated protection and to ensure service continuity. Energy continuity is critical on large sites.

What industrial electrical components & automation solutions do you offer?

We offer a vast range of industrial electrical components and automation solutions. This includes everything from circuit breakers, switchgear, and motor control to sensors, safety equipment, power quality solutions, and advanced automation systems. We partner with world-leading brands and develop our own specialised solutions.

Give your motor equipment the protection it needs by installing quality motor circuit breakers and switches. Our range has a high breaking capacity at a very compact design. Use it to give your motor ...
