-----

BatteryNL will realize safer next-generation batteries with higher energy densities and longer cycle life, as demanded by a society based on renewable energy sources.

The Netherlands offers little space for giga battery factories but aims to be a big contributor to the European industry by acting as a major player in the supply chain of battery technology as well as in ...

To seize and, above all, accelerate the opportunities of the energy transition and battery technology, the Battery Competence Cluster - NL, together with industry, knowledge institutions and trade ...

By accelerating the development of affordable, Netherlands-made batteries, this program strengthens the Netherlands' clean industrial base, enhances energy security, and positions The ...

NWO and the National Growth Fund programme Battery Competence Cluster NL (BCC-NL) are awarding nearly 14.5 million euros to three projects for the Call "Technology development for ...

The region is home to OEMs, to companies developing the new generation of battery technologies, such as solid-state batteries, as well as providers of charging infrastructure, battery packs, and companies ...

Get our insights on battery innovation, electrification, events and more. Dutch manufacturer of Lithium-ion batteries for e-mobility and industrial machines. We offer standard and custom made battery ...

Within Europe, the Netherlands is one of the leading countries when it comes to developing next generation and more sustainable battery materials and components. It already has ...

The cluster focuses on four key growth opportunities for the Netherlands related to battery technology. The development of battery systems and packs, especially for heavy-duty applications in road ...
