A framework for the "development, utilisation and commercialisation of energy storage systems" in the Philippines has been passed by the House of Representatives.

NLR research is investigating flexibility, recyclability, and manufacturing of materials and devices for energy storage, such as lithium-ion batteries as well as renewable energy alternatives.

By exploring energy storage options for a variety of applications, NLR's advanced manufacturing analysis is helping support the expansion of domestic energy storage manufacturing ...

How are startups advancing energy storage for the clean energy era? Discover 10 Battery Storage Startups to Watch in 2026 and their cutting-edge solutions! From utility-scale BESS and ...

The industry is building 25 new or expanded manufacturing facilities to support the grid-scale energy storage market, with 11 already in operation or under construction.

This review aims to bridge that gap by comprehensively analyzing advancements in energy storage technologies over the past decade, evaluating key performance indicators such as ...

Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of emerging ...

China has unveiled an action plan to boost full-chain development of the new-energy storage manufacturing industry, aiming to expand leading enterprises by 2027, enhance innovation ...

WEG announces the construction of a new manufacturing plant dedicated to the production of battery energy storage systems (BESS) in Itajaí, Santa Catarina. The facility will be the most ...

New energy manufacturing-energy storage

LG Energy Solution Vertech and Qcells - leaders in energy solutions and products - has announced a multi-year commitment to install reliable, affordable, American-made storage products ...
