We have new owners and a new name, we started a pioneering project to construct a facility for full-scale carbon capture and storage at our Klemetsrud waste incineration plant, and we had zero ...

Technip Energies (PARIS: TE) has been awarded a large(1) Engineering, Procurement, Construction (EPC) contract by Hafslund Oslo Celsio, the largest supplier of district heating in Norway, for a world ...

Fortum Oslo Varme joined us for a chat on their plans to implement the first full-scale carbon capture and storage project capturing flue gas CO₂ from a waste-to-energy plant.

Norway's energy storage industry landscape is undergoing a remarkable transformation, positioning the country as a frontrunner in sustainable energy storage ...

Let's cut to the chase: Oslo builds largest energy storage station, and it's not just another infrastructure project. This 1.2 GWh behemoth, set to power 180,000 homes during peak demand, is ...

The Klemetsrud CO₂ capture and storage project by 2026 will be the world's first waste-to-energy plant with full-scale CCS. The Bellona Foundation has worked on this project with Oslo and Fortum Oslo ...

Large-scale energy storage system: safety and risk assessment The International Renewable Energy Agency predicts that with current national policies, targets and energy plans, global renewable ...

Norway's capital, Oslo, has emerged as a global leader in renewable energy adoption. With ambitious goals to reduce carbon emissions by 55% by 2030, the city's energy storage project bidding process ...

Based in Oslo, the business uses complete, second-life electric vehicle batteries to create energy storage systems that minimize environmental impact while offering industry ...

The Nordic Energy Paradox: Abundant Renewables, Limited Storage Norway generates 98% of its electricity

Oslo large-scale energy storage project

from hydropower, yet faces seasonal imbalances that new battery systems aim to solve.
