The broad line of aluminum and brass S-5! clamps are extremely versatile, fitting most standing seam and exposed-fastened metal roof profiles, including most structural and architectural profiles.

With the new FA PV Seam Clamp, Kalzip, in collaboration with DICONAL, offers a pioneering solution for the simple and secure integration of photovoltaic modules on Kalzip roofs.

We have conducted hundreds of tensile load tests parallel to the panel seam and on various gauges and profiles, and we have tabulated the results for your convenience.

We've engineered our extensive seam clamp range to meet every requirement of all standard seam roof manufacturers, providing you with an easy and universal solution and guaranteeing stable fastening ...

The AceClamp®; A2®; features our non-penetrating pin design and a grounding slot with a stainless steel sleeve for wire security, making it a perfect choice for most solar panel mounts for metal roofs.

Can you save money by mounting solar on a standing seam metal roof? S-5-HR offers the first clamp designed for solar mounting on Steel & Tube profiles. Durable, corrosion-resistant, and easy to install.

Whether you're completing a small residential installation or need components for a larger system, these seam clamps offer the flexibility to meet your specific project requirements.

Discover how easy it is to install a solar array on a standing seam metal roof without the need for traditional rails! In this brief tutorial, we demonstrate the simplicity and efficiency of using the S-5!

Durable non-penetrating solar clamps for standing seam metal roofs. Quick installation, waterproof, and ideal for rooftop solar mounting.

No matter what kind of roofs to mount solar photovoltaic racking, don't hesitate to contact with us! As an

Photovoltaic panel cross seam clip

innovative solar mounting brackets for wide applied standing seam metal roofing. Our clamps can ...
