---

The invention relates to the technical field of photovoltaic module processing, in particular to series welding processing equipment and a welding method for a photovoltaic panel cell.

The photovoltaic string welding machine is mainly composed of a control system, a welding system, a cooling system, and a workbench. Its working principle is mainly to use high temperature to weld ...

The first phase in a photovoltaic module manufacturing line is joining the solar cells, which is done by a solar tabber and stringer, a totally automatic machine able to optimise the ...

solar photovoltaic automatic string welding machine adopts infrared roller hybrid welding technology, which can fully automatically weld traditional and double-sided batteries, as well ...

The automatic photovoltaic string welding machine, with its flexible compatibility, can adapt to the welding of solar cells of various specifications, meeting the customized needs of the...

Shingled terminal head welding machine is an automatic equipment to do welding at both heads of solar module string cells with the ribbon.

The CTM-60BC high-speed string welding machine uses zone-specific temperature control with multiple independent heating modules and PID regulation. This ensures uniform heat ...

Before troubleshooting cold solder joints in Solar panel, it is essential to understand the fundamental process of string welding: under the action of the traction mechanism, the solder ribbon ...

Follow these procedures when string welding a solar panel: Check for the defects on the cell. These include improper angle, lack of edge, and the poor state of the welding belt.
