---

The PV panels water drained away clip is a self-fastening clip, made of plastic. The length is about 68 mm, weight 8 grams, and the width is based on the thickness of the panels aluminum alloy frame.

Photovoltaic module water guide and mud discharge clip (referred to as: water guide clip) Material: Plastic Sizes: 30, 32, 35, 40, 45 and 50mm Scope of application: Remove mud bands formed by rain ...

Design: Solar panel water drainage clips are usually designed to be durable and weather-resistant, capable of withstanding outdoor conditions for extended periods. They are often ...

Prevent dirt buildup: These clips guide water and mud off the solar panel, preventing dirt and dust from accumulating along the lower edge of the frame. This helps maintain optimal panel efficiency and ...

PV panels water drain clips is used to guide water and mud above the solar panel and clean dust and sand on the surface. The installation method is simple. You only need to clamp the clip on the frame ...

The SFS-WDC removes the water and dust, keeping the PV panel clean. It is easy to install--simply press and snap the clamp at the lowest point of the panel, no tools are required.

Learn how the water drainage clips for solar PV panel frame work to improve drainage, prevent corrosion, and extend solar panel lifespan

The photovoltaic panel drainage clip is a practical accessory specially designed for solar modules. It is made of weather-resistant ABS engineering plastic and can be easily installed on the ...

Stainless steel solar panel water drainage clips: The solar panel water drainage clips can remove the water and dirty of solar panel, to increase the power generation.

# Photovoltaic panel water guide clip material

[ROBUST 304 STAINLESS STEEL MATERIAL] Constructed with strong 304 stainless steel, this water guide clip is built to withstand various weather conditions while ensuring long-lasting ...
