Siemens Smart Infrastructure, in partnership with Fluence, is working to help the Portuguese island of Madeira to increase energy independence and grid resilience using renewable ...

Energy storage technology provider Fluence and Siemens Smart Infrastructure have completed a renewable energy microgrid project on Terceira, a Portuguese Azores island.

Porto Santo, a Portuguese island in the Madeira archipelago, is home to about 6,000 people. The Portuguese government aims to make Porto Santo the first smart, fossil-free island in the world and ...

The Graciosa Hybrid Renewable Power Plant enables 1 MW of solar, 4.5 MW of wind power, and a 6-MW/3.2-MWh energy storage system to be supplied to the local grid. The hybrid ...

Hitachi ABB Power Grids has teamed up with Groupe Renault to deploy an energy storage system on the Portuguese island of Porto Santo, Smart-energy reports.

This project represents the journey towards a 100% renewable energy future with a completely integrated power system on an island grid combining energy storage, engines and renewables.

The Siemens Group has now handed over the project on Terceira in the Azores to the Portuguese energy provider EDA. Innovative software and a power buffer with 15 megawatts of ...

The Praia grid-side energy storage project solves real-world problems while pushing the \$33 billion global energy storage industry into new territory [1]. This Portuguese marvel isn't just ...

Lithium-ion batteries from Leclanche will be deployed in what is believed to be "the world's first MW-scale renewable energy plus storage system" on the Portuguese island of Graciosa.

Portuguese Island Energy Storage Project

Porto Santo is a tiny speck of land working on a big dream: to be the world's first smart, fossil fuel-free island with the help of electric cars and V2G.
