-----

The PV poverty alleviation effect is stronger in poorer regions, particularly in Eastern China. Our results are robust to alternative specifications and variable definitions.

The research highlights the role of solar PV in alleviating poverty and advancing the SDGs, offering valuable insights to decision-makers seeking to leverage solar energy for sustainable ...

Across the world, from China to Brazil, solar energy is being used not just to cut planet-heating gases from fossil fuels, but also to alleviate poverty. This is increasingly also the case in...

Equipping people with the skills needed to operate, maintain and manage solar panels is critical in enabling people to engage in productive activities that increase their incomes while ...

China's photovoltaic poverty alleviation projects (PPAPs) aim to help alleviate poverty by using the new energy power generation. In recent years, the PPAPs have flourished with the strong ...

Energy poverty is a serious problem worldwide and has attracted the attention of policymakers. As a type of social welfare project, photovoltaic poverty alleviation projects (PPAPs) ...

Abstract Motivated by a widely practiced strategy to combine the growth of the solar energy sector with poverty mitigation, we propose stylized models of households selling extra solar ...

Traditional projects have sought to benefit low-income households by addressing energy poverty and/or by selling the electricity generated to the grid company. Such programs have been established in sub ...

China implemented a solar photovoltaic (PV) poverty alleviation (PVPA) policy of building nearly 0.24 million PVPA power plants in 2014-2020 to fight poverty.

Poverty-alleviation programs using solar energy (PAPSE) are poised to unlock unprecedented capital
