How much does a solar panel installation cost in Malaysia?

A typical residential solar panel system in Malaysia is 6.6kW and a good quality installation will cost between RM18,500.00 up to RM30,000.00. But why the big difference in cost? Whether a 6.6kW system is an appropriate size installation for you or not is a good question and will depend on your electricity usage.

Can You DIY solar panels in Malaysia?

No. Installing a home solar system by doing-it-yourself might be appealing, but several factors discourage DIY solar panel installation in Malaysia: Solar panels in Malaysia are not readily available to the public. Procuring the required equipment may be challenging and could lead to higher costs and logistical hurdles.

How much does a 5 kilowatt solar system cost?

In other words, a 5-kilowatt (kW) system, which is the average size for a residential solar installation, would cost around RM35,000. This cost includes the cost of the solar panels, the inverter, the mounting system and the installation labour.

How to choose a solar company in Malaysia?

Major city-states like Kuala Lumpur, Selangor, Penang, Johor Bahru (JB), Ipoh, and Melaka typically have more solar companies, which helps drive down costs through competition. Tip: When comparing costs, ensure providers are offering quotes on a like-for-like basis. Some providers may appear cheaper upfront but include hidden charges later.

The price of your new solar system will, of course, depend on how big the installation is. Meaning, how many kilowatts (kW) of solar panels you choose to install will affect how much it costs. ...
