Mumbai: India has surpassed Germany as the world's third-largest generator of electricity from solar and wind power sources in 2024. Solar and wind energy generated 15 per cent of global ...

This dashboard ranks countries/areas to their renewable energy power capacity or electricity generation. The data can be further refined based on region, technology or year of interest.

Renewables consist of hydro (47%), wind (26%), solar (18%), biomass (8%) and geothermal (1%). China produced 32% of global renewable electricity, followed by the United States (11%), Brazil (7.0%), ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

Solar energy capacity is growing rapidly, driving the global transition to renewable energy. This graphic visualizes the top 15 countries by cumulative megawatts of installed ...

This global solar energy movement is supported by the incredible, expansive solar farms that are being built around the globe. This SolarPower.Guide infographic explores the largest solar power plants in ...

Find up-to-date statistics and facts on the global solar photovoltaic industry.

Renewables consist of hydro (47%), wind (26%), solar (18%), biomass (8%) and geothermal (1%). China produced 32% of global renewable electricity, followed by the United States (11%), ...

The Global Solar Atlas provides a summary of solar power potential and solar resources globally.

Our rundown of the countries around the world using the most solar energy, from Mexico to China

Ranking of solar generators around the world

Explore the top solar power countries in 2025, including China, the U.S., India, Japan, and Germany, plus emerging leaders like Brazil and Australia, driving the global shift to sustainable ...
