Which ASEAN countries have a different electricity market structure?

ASEAN member states exhibit diverse electricity market structures. Brunei, Cambodia, Lao PDR, and Myanmar rely mostly on vertically integrated models and state-owned utilities. In contrast, Indonesia, Malaysia, Thailand, and Vietnam have introduced some level of competition through private independent power producers.

Will Thailand be a central hub for electricity trade in ASEAN?

Power trade in ASEAN is gradually moving from bilateral connections to a more integrated network involving renewable sources. Due its geographical location and economic size,Thailand is poised to serve as a central hub for electricity tradebetween the northern and the southern regions of ASEAN.

What is the power mix in ASEAN?

While fossil fuelsdominate ASEAN power mix (accounting for 76%),hydroelectricity infrastructures are well developed in the region,providing 17% of the electricity. Other renewables account for the remaining 7% of the electricity production.

Which ASEAN countries produce the most electricity?

As depicted in Figure 2,some ASEAN countries produce a decent share of their electricity from renewable sources,especially hydroelectricity,contributing to more than half of power generation in Myanmar and Cambodia,and up to 70% in Lao PDR.
