Can a photovoltaic roof hook be installed on a tiled roof?

With the photovoltaic roof hooks TRI-STAND BASIC, PLUS and PRO, you can mount solar systems optimally on a tiled roof. Roof hooks form the foundation of PV mounting systems on tiled roofs and are mounted directly onto the rafters/roof battens. TRITEC has developed various types of roof hooks to meet individual requirements.

Why do you need a tile roof hook Solar System?

The use of a high-quality tile roof hook solar setup prevents leaks, keeps your tiles intact, and ensures your solar panels can stand up to wind, rain, and temperature fluctuations without shifting or causing stress to the roof below. 1. Standard Tile Hook This is the most commonly used style.

Can you install solar panels on a tile roof?

When you're dealing with a tile roof, mounting solar panels isn't as straightforward as drilling into shingles or screwing brackets into a metal roof. Tile roofs are fragile, often custom-shaped, and can be easily cracked if handled improperly. That's where the tile hook comes in.

What is a tile hook Solar System?

PV hook systems (short for photovoltaic hook systems) go a step further, often integrating with rail systems and supporting brackets for a seamless, modular solution. Whether you're mounting a small rooftop array or a full-scale residential installation, using the right tile hook solar mounting method can make or break the project.
