Schematic representation of hot water thermal energy storage system. During the charging cycle, a heating unit generates hot water inside the insulated tank, where it is stored for a short period of time.

In this work a commercial storage design for storing cold thermal energy has been studied using a laboratory prototype containing 168 kg of a commercial salt-hydrate phase change material...

In this image we have the same water loops as the chilled water storage tank system. There is the primary chilled water loop, condenser water loop, and secondary chilled water loop.

1 question, what is the max size a schematic can be. Or is it just infinite? The limit of the schematic format is 65536x65536x65536 I believe. In Minecraft that basically means ...

Cubical is an online WebGL based schematic creator, editor and converter that tries to hold true to some basic Minecraft features. It started as a simple side project to provide a preview for ...

Every time i try to use the schematic canon it crashes my game, i dont really know how to read crash logs. Im playing the prominence modpack on the newest v...

Fig. 2 TES chilled water plant schematic with ice storage tanks. Chilled water TES acts like a battery for process and HVAC cooling loads. It uses standard cooling equipment with the addition of an ice ...

Have you ever found a schematic but couldn't use it because it was in the wrong format? Maybe you found a schematic online and wanted to use it in WorldEdit. Today, I'm introducing ...

?Download (Java/Bedrock/Schematic/Litematic) Recently, I came up with a simple starter house idea for a Minecraft survival playthrough. This house i...

A thermal energy storage tank can reduce operational costs by storing thermal energy until it can be used later. They can also add resiliency to traditional heating and cooling systems in the event of power failure.

A chilled water pump circulates the cooling water through the ice storage tank where it is cooled to the desired temperature and distributed throughout the system.

The key objective of this study is the demonstration of the impact of new sizing and operating strategies on energy-saving potential while implementing chilled water storage with an air conditioning system.

The generated schematic is then given to gpt-4-vision-preview along with the optimized requirements to generate a json containing the content of the structure, for example:
